I am a passionate software developer with strong foundations and problem-solving skills. I reflect my commitment as a professional by constantly participating in projects. I seek to progress in a dynamic development environment.

EXPERIENCE

Devdatep Consulting | Web Design Lead   Sep. 2023 - Present

I led my work team, supervising and managing projects, guaranteeing punctual deliveries and exceptional quality. I collaborated in the design and prototyping of the aesthetics and the flow of interactive applications, encouraging creativity and cooperation.

Tecnovedades Web | Full Stack Developer   Oct. 2023 - Present

I contribute to the design of the application flows to be implemented. Additionally, I am skilled in creating interactive prototypes for proposed solutions and developing fully functional web applications using a collaborative approach.

PROJECTS

Smart Reserve

I designed a system that allows students at my institute to reserve computers efficiently and easily, by developing a mobile application aimed at users and a web application aimed at the administrator.

ABILITIES

Languages: HTML, CSS, JavaScript, Java, PHP, Kotlin, Swift
Frameworks & libraries: React, Angular, .NET, ASP.NET, Bootstrap
Databases: MySQL, MongoDB, SQL Server, PostgreSQL
Other: Intermediate English level, Figma, Canva, Git, Github, Trello

EDUCATION

TECSUP - Software Design and Development   Mar. 2021 - Present

Student positioned in the top third and winner of the 2022 Pronabec Scholarship.
